

SUCCESS STORY OF FARMERS ON WATER HARVESTING TANKY AT E. LUNG DAR VILLAGE, SERCHHIP DISTRICT

PROFILE

Name of the activity: Water Harvesting Structure And Other Irrigation Structure

Village: East Lungdar

Name of FIG: Tuipui Landless FIG

District: Serchhip

Capacity: 30000 litre (5M x 3M x2M)

INTRODCUTION: Village Council of E. Lungdar village allotted land at tuipui zau for Tuipui landless FIG member. At present, 20 families cultivated kharif and rabi crops. Their land is located near Tuipui river and have a good source of water. But during dry season, there is shortage of water for irrigating their crops due to lack of water storage structure.

FOCUS INTERVENTION: DMU-Serchhip FOCUS allotted 1 no. of water harvesting structure in which FIG members contributed money and constructed two (2) water intake. After completion, the stored water is collected by using power pump (water pump) which they have received from FOCUS. Thus, increases the availability of water during dry season and fully utilized for rabi cultivation and their income is also increased, FIG members are grateful to FOCUS project.
